Easy pH Simple and Affordable

Easy Acid-Base Titrations

Everything you need for automated acid/ base titrations by pH endpoint or to an inflection point plus simple pH measurements. Be prepared for any sample matrix with our aqueous and non-aqueous pH sensors.

Easy App Guidance

This filtrator has been especially designed for simplicity. New operators are already familiar with the Smartphone like Apps oriented user interface. Start your routine analysis with a LongClick[™] on the home screen. The intuitive navigation speaks your language and 14 others. Learning and using a new analytical instrument has never been so easy.

Swiss Engineered

EasyPlus[™] Titrators are designed and constructed by our Swiss development team according to the highest possible software and hardware standards. Their renowned expertise has made the impossible possible; to develop such a high quality instrument with such a small footprint.

iTitrate for Easy Programming

iTitrate Intelligence makes method programming simple with EasySetup guidance. Set only the minimal parameters and the titrator programs the rest, including correct calculations based on desired measurement units. Easy setup equals swift implementation.

Easy pH Titrator for Acid / Base Titrations

The Easy pH Titrator simplifies and speeds up automated acid/base endpoint or inflection/equivalence point titrations. The simple 'App' style user interface reduces training time while increasing work speed and simplicity. iTitrate Intelligence's guided set-up assists in method programming to ensure samples are tested consistently, regardless of operator, and with minimal effort. Eliminate manual calculations and documentation with a printer or EasyDirect[™] Titration PC Software.

Its choice of aqueous and non-aqueous pH electrodes makes this titrator ideal for the following applications and many more:

- Acidity content of juices, wines and milk.
- Alkalinity of cleaning reagents and chemicals.
- Free fatty acid content of cooking oils.
- Alkalinity (m-value) and acidity (p-value) of water.
